Joaquín Serra Caggiano

Valencia, España · Portfolio · +34 624 750 408· joaquincaggiano@gmail.com

Software Developer with one year of experience, passionate about continuous learning. Currently, I work in a startup where I am involved in the development of innovative projects that allow me to improve my skills every day.

PROFESSIONAL EXPERIENCE

Desaway   **Valencia,España**
Frontend developer   *December 2023–Currently*

- **I developed custom mobile applications and web pages** for various clients, adapting to the unique needs of each project. Each solution was designed from scratch, with customized logic, ensuring innovative and functional products.

- **I carry out almost the entire development process,** from the interpretation of the mockups that the designer provides me to the implementation of styles and functionalities in the interface. I ensure that the user experience is consistent with the design vision, transforming ideas into interactive and engaging final products.

- **My main focus is on the frontend,** where I develop fluid and visually stunning user interfaces using modern technologies such as Next.Js and React Native. However, I also take care of backend tasks, such as creating databases, implementing schemas in Prisma and business logic in Node.js.

- **I have managed the complete documentation of the applications I develop,** ensuring that the processes and solutions implemented are well described. This has facilitated maintenance and future expansions, improving the team's efficiency in managing long-term projects.

- **I collaborate closely with the design team,** working hand-in-hand with the designer to translate their mockups into functional interfaces, ensuring that the design and user experience are faithful to the original vision. This has allowed me to hone my ability to combine aesthetics with functionality.

- **I develop innovative products with different logics in each project,** which has allowed me to improve my technical skills and maintain an open mind to constant learning. Each project has offered me the opportunity to face unique challenges, which has fueled my professional growth in multiple areas of development.

Coder House   **Buenos Aires, Argentina**
Backend Tutor   *June 2023–September 2023*

- **I was a tutor for a backend course,** where I guided students in their learning process. I accompanied each student to ensure they understood fundamental concepts and applied good development practices.

- **I corrected students' exercises,** offering detailed feedback on their code. My goal was for them to not only solve problems, but to improve their ability to write clean, efficient, and scalable code.

- **I clarified technical and conceptual doubts,** helping students overcome blocks in their learning. I made sure they understood both the theory and its practical application in solving problems.

- **I accompanied the students throughout the learning process,** not only providing technical support, but also motivating them to continue improving and adopt a proactive mindset towards backend learning.

EDUCATION

UDEMY   **Rosario, Argentina**
React Native course

UDEMY **Rosario, Argentina**
Next.Js course *Febrero 2023*

UDEMY **Rosario, Argentina**
React course *Agosto 2022*

UDEMY **Rosario, Argentina**
Javascript course *Junio 2022*

DIGITAL HOUSE **Rosario, Argentina**
Full Stack developer *Mayo 2022*

UNIVERSIDAD ABIERTA INTERAMERICANA **Rosario, Argentina**
Graduate in kinesiology and physiatry *Marzo 2021*

SKILLS

- Javascript
- Typescript
- React
- React Native
- Next.Js
- NextUi
- Node.Js
- Prisma ORM
- Express.js
- PostgreSQL
- Next Auth
- Git
- MobX State Tree
